

Lifecycles

UPPER
KS2

SESSION CONTENT:

- Compare the life cycles of local animal species
- Build lifecycle diagrams for animals from around the world
- Explore the life process of reproduction

NATIONAL CURRICULUM LINKS/LEARNING OBJECTIVE:

- Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird
- Compare the life cycles of animals in their local environment with others around the world
- Describe the life process of reproduction

LENGTH – 45 MINS

COST – £50

UP TO 35 PEOPLE
(including staff)

PRE VISIT:

Research the lifecycles of a butterfly and a frog. Be able to group animals into four main groups: a mammal, an amphibian, an insect and a bird.

POST VISIT:

Identify the different life stages of an animal you may see in your garden or at school.
